(54) Title: RADIATION-CURABLE RESIN COMPOSITION, CURED FILM OF THE COMPOSITION, AND LAMINATE

(57) Abstract: The present invention relates to a radiation-curable resin composition which produces a cured film having low surface resistivity and high transparency, a cured film of the composition, and a laminate including a layer of the cured film. The laminate of the present invention is suitably used as a hard coat material for preventing scratches or stains on a plastic optical part, touch panel, film-type liquid crystal element, plastic container, or flooring material, wall material, or artificial marble as an architectural interior finish, adhesive and sealing material for various substrates, vehicle for printing ink, or the like.
